

**ZT1042 Graphite Upper Deck 2.0mm Narrow Type(for XRAY T4 '17/18)**

This product is a narrow type upper deck of ZEROTRIBE original shape. It was developed with the aim of improving the tracking performance of the front tire. When using a high grip tire or high grip road surface will match best! It will be a new setting item that can change the running characteristics when using the control tire!. We also support ZT 1043 stock conversions released by our company.

**ZT1050 Chassis GRAPHITE Hard Type (for XRAY T4 '18)**

This product is domestic carbon main chassis (hard type) for XRAY T4 '18. The shape and the hole position were the same as the original chassis, and a new 2.4 mm thickness was adopted. By improving rigidity and lowering the center of gravity, it is the characteristic between the standard type carbon chassis and aluminum chassis. It corresponds to all conditions by sharing with the upper deck of 1.65 mm and narrow type upper deck.

**ZT1051 Front damper stay Graphite for ULP shock system (for BD 8 2018)**

This product is a low-down damper stay for installing the ULP shock system for XRAY T4 and HIGH BIG BORE SHOCK II made by AXON in YOKOMO BD 8 2018. By lowering the center of gravity of the mounting position of the shock, it is possible to hold extra rolls. Especially when you drive on a high grip road surface the stability feeling increases.

**ZT1052 Rear damper stay Graphite for ULP shock system (for BD 8 2018)**

To install and run this product, please purchase XRAY 3083080 # aluminum ULP damper set [2pcs / orange] or AXON HIGH BIG BORE SHOCK II (for XRAY T4 2018) separately.
