

## ZT1014 FWD Conversion Kit(for XRAY T4 '15 ~ '17)

This T4 FWD conversion kit is a product plus the pleasure of driving unique to FWD to the popular T4 series with outstanding running performance. I designed as much as possible the excellent layout of the T4 series. In order to make settings that change the battery position and change the chassis balance, we set the motor position in front of the front axle. Like the T4, the layout with low center of gravity has many advantages as FWD cars. Sharing of setting parts is possible by using T4 as it is for suspension.

※This kit is a conversion kit.  
XRAY T4 ('15 ~ '17), complete set of RC equipment, body, tires, batteries etc are required before traveling. The image is prototype, optional parts equipped car.  
Please acknowledge that specifications may be changed without notice.

Body post for using the narrow roof body can be mounted on the rear side damper stay.

The drive pulley is equipped with 18T as standard.  
Option 15T (Pulley & Belt Set for low gear) set.  
For the primary reduction ratio, 2.11 for 38T - 18T and 2.53 for 38T - 15T can be selected.
